**3 (1998 2001. 3)**

Figure 1 is a line graph showing the number of cases of COVID-19 in the United States from March 2020 to March 2021. The x-axis represents time in months, with labels for March 2020, May 2020, July 2020, September 2020, November 2020, January 2021, March 2021, and April 2021. The y-axis represents the number of cases, with labels at 0, 70, 90, and 103. The graph shows a sharp increase in cases starting in March 2020, peaking in April 2021 at 103 cases, and then declining.

1. The first group of variables, *demographic*, includes age, sex, and marital status. The second group, *education*, includes years of schooling, high school graduation, and college graduation. The third group, *employment*, includes employment status, occupation, and industry. The fourth group, *income*, includes household income and poverty status. The fifth group, *health*, includes self-rated health, chronic conditions, and functional status. The sixth group, *social*, includes social network, social support, and social participation. The seventh group, *psychological*, includes depression, anxiety, and life satisfaction. The eighth group, *behavioral*, includes smoking, drinking, and physical activity. The ninth group, *environmental*, includes housing, neighborhood, and transportation. The tenth group, *service*, includes health insurance, health care access, and health care utilization. The eleventh group, *outcome*, includes health status, quality of life, and health care costs. The twelfth group, *control*, includes other variables that may affect the outcome.
